

AP Biology Summer Assignment, 2020-2021

Welcome to AP Biology 😊

We have a great year ahead! The summer assignment is designed to help you introduce yourself and review how to analyze data to best start the year on the same page. Have fun, and please don't stress about this; the idea is for you to enjoy your summers (you deserve it!) and have a little review before we return! - Mr. Callahan

2 Steps to starting your summer assignment:

1. Check in to the Google Classroom for the class for the upcoming year. **Class code to join is "jkehdc6"**. This is how I will communicate with you over the summer and during the school year. By joining the class, you are "checking in" for the summer work and committing to completing ALL summer work by August 5th.

All summer work, including assignments will be posted by June 1 in the Google Stream and in "Classwork" tab under module- "Summer Assignments"

2. Textbook/student materials distribution: You do NOT need the textbook or supplemental resources for summer work. However, please log on to the college board website and book mark it as a primary source we will use throughout the school year.

<https://myap.collegeboard.org/login>

****NOTE- IF we start the school year from home(Digital Learning) a book/supplemental resources WILL be issued to you before August.**

Please email me at brad.callahan@socialcircleschools.org with ANY questions. I am so excited to be teaching you in this amazing course this year!
